

**ERA**

WORKSTATION

 Keller

Economical, Convenient and Optimum. So the ERA workstation is designed and made in accordance with the above criteria and its final purpose is to provide end users with high-quality, modern office furniture. The specific and unique design of the ERA system offers flexible workstation configuration at any angle from 90° through 270°, is easy to assemble or reconfigure. Era's multi-optional wire management, multiple-options partition skins, along with as complete series of specifications and dimensions etc. enables creativity in the workplace.

# » Flexibility & Adaptability

## Traditional working area

This is typical in large open space layouts.

**ERA**  
WORKSTATION

03/04

## Executive area

Era system products can be used to create multifunctional work environments for executives and Era's wide range of options easily accommodates company hierarchy levels.

## Interactive working area

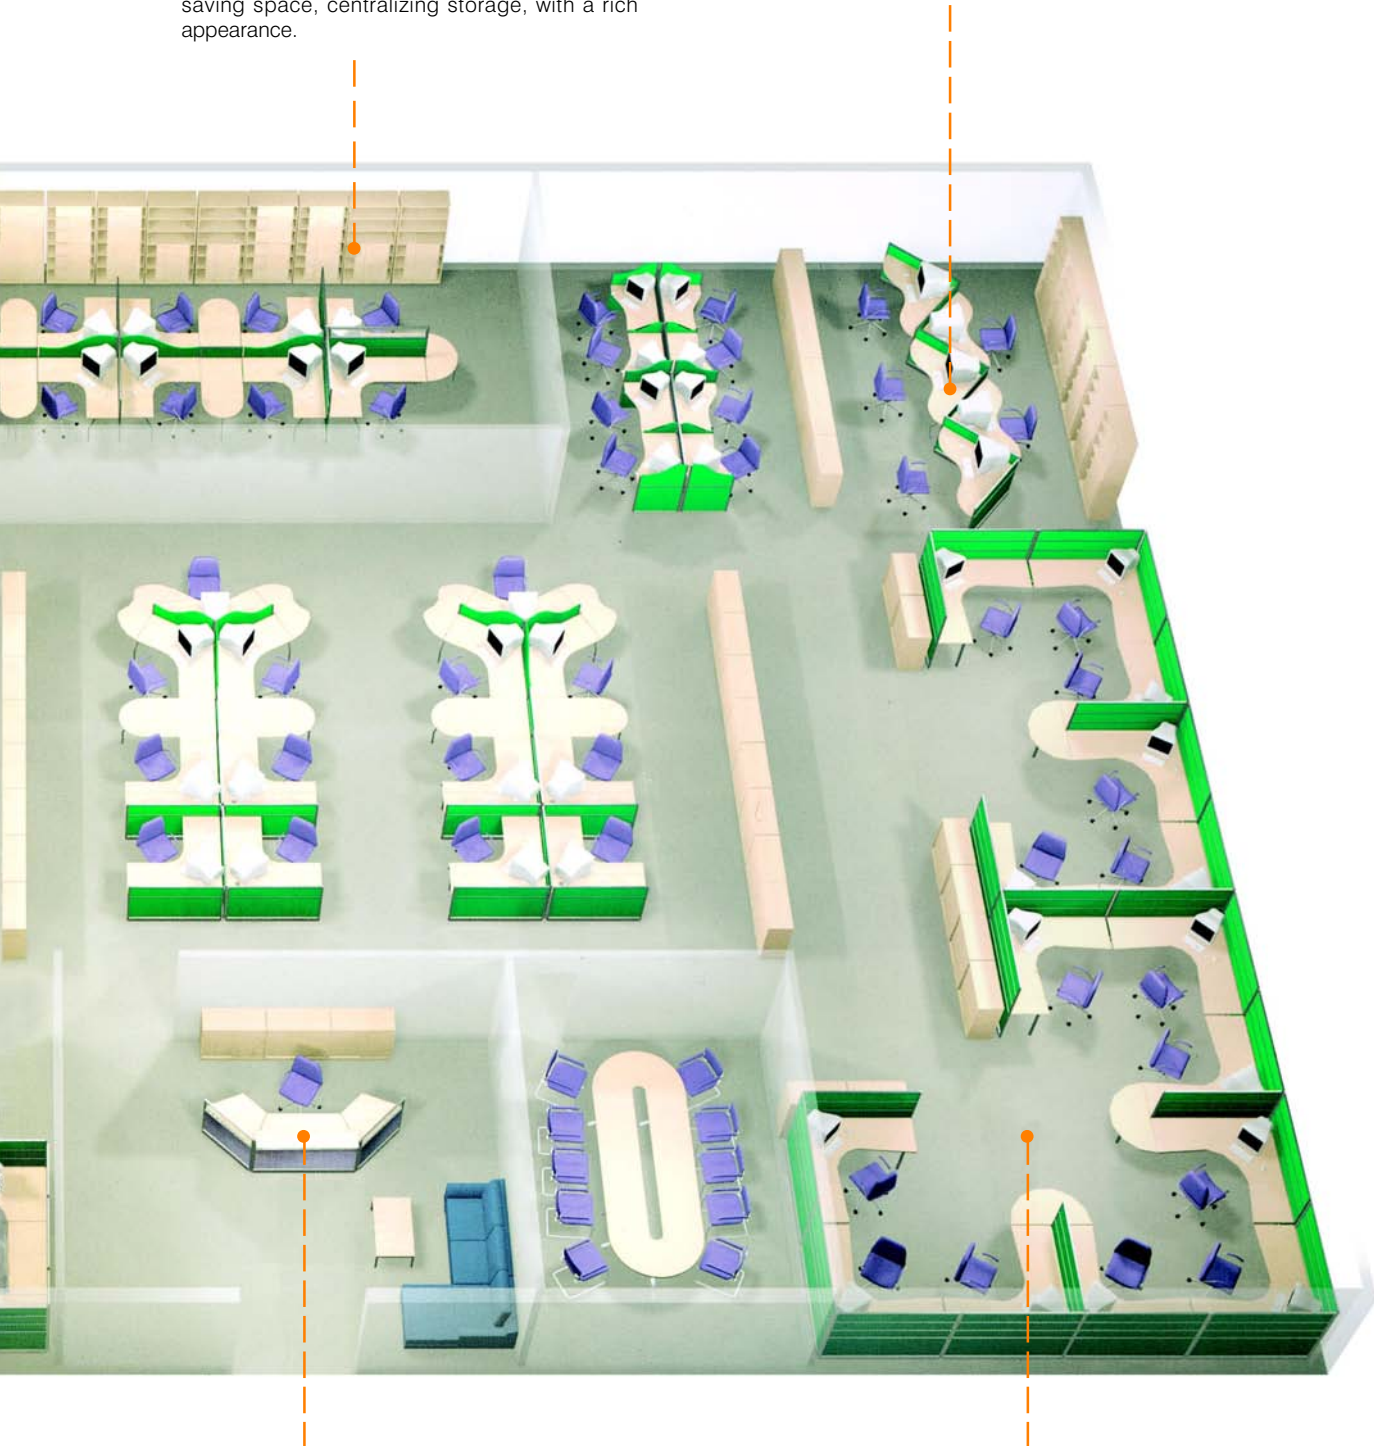

Era offices can be planned in highly specific, very flexible ways to distinctly divide space but at the same time encourage interaction between workgroups or departments.

**Cabinet system**

A comprehensive choice of storage modules can be arranged creative in wall-unit configurations, saving space, centralizing storage, with a rich appearance.

**Service centre area**

This layout minimizes space utilization and facilitates administrative supervision.

**Reception areas**

A reception desk can say a lot about a company. Era's design and finish options can be tailored to provide that special image for a company... the image that visitors see when they walk in the front door. Please take a look at the 135 degree reception desk and see for your self its elegance and functionality.

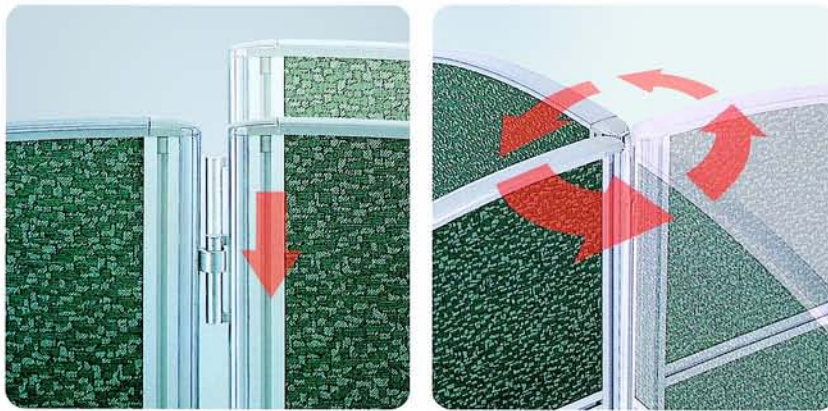

**Team-working area**

Era System can be configured for teams that require efficient communication yet relative independence and privacy.

## » *Integrated Working Areas*

### **Modular Design Options**

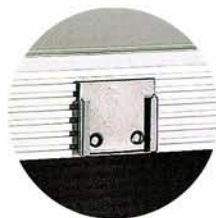

Era system partitions are connected using a unique hinge system where the angle can be set from 90° to 270° without requiring a post. This hinge-linking system saves not only money but also time when assembling or reconfiguring workstations.

**ERA**  
WORKSTATION

05/06

Era systems Accessory Rail offers a wide range of hang-on accessories...at your choice!

# » Executive Area

"ERA" workstation system can satisfy your demands...whether its real time meeting layouts, file storage, privacy, interaction, accessories, more worksurface, etc.

**ERA**  
WORKSTATION

07/08

Multi-option work top-supports

Hanging cabinets with flipper doors

White-board screen and pin-board screen

# » Wiring Management

"ERA" system manages your power and data cables economically and flexibly. Normally, the system does not require channels to be added to the screen as wiring bypasses and outlets underneath or above the work top handle the cables very well. Solutions for vertical cable management from the ceiling, floor or wall are provided.

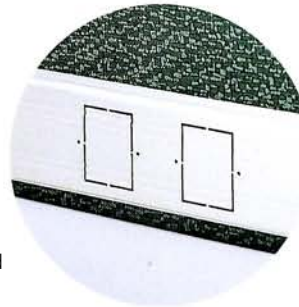

**ERA**  
WORKSTATION

09/10

Power sockets installed on cable channels

Pre-drilled hole positions for power sockets

Cabling in raceway

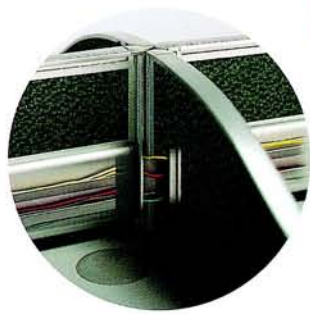

Continuous cabling between screens

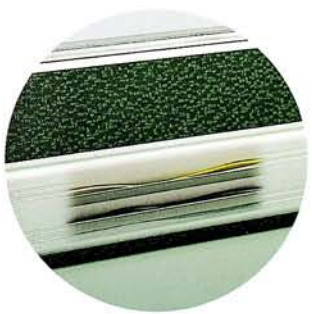

Vertical cabling from floor

Vertical cabling from ceiling

Cross-screen wiring

Cable channel above work top

## » File Storage

"UNI" series of cabinets are available in different heights, widths and colors, which offer a multitude of layout planning designs and configurations.

"UNI" cabinet series has an extensive range of door options, hinged or sliding. Locks are available on all door options. Inner shelves are easily adjustable to a convenient height. Design your own cabinet layout to satisfy your individual requirements for storing and managing files... and all that other "stuff" that needs to be stored. All UNI cabinets are fitted with levelers which can be adjusted to compensate uneven floors.

**UNI**  
STORAGE

11/12

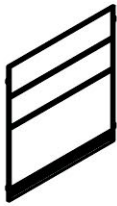

Compound file cabinets accommodate clothing and sporting equipment storage.

Standard file cabinets are ideal for bulk data storage

## Complete set of panels
